Dr Eng. Jan Pająk

"Web pages of Jan Pająk - [katrina.pdf](#)"

(i.e. a PDF brochure with the content of web page named [katrina.htm](#) and entitled

"Hurricanes formed technically by UFOs"

Wellington, New Zealand, 2013,

ISBN 978-1-877458-69-9.

Copyright © 2013 by Dr Eng. Jan Pająk.

All rights reserved. No part of this brochure may be reproduced, stored in a database or retrieval system, transmitted, or distributed in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior written permission from the author or a person legally authorized to act on his behalf. From the obligation of getting such a written permission are only released those who would like to prepare a single copy of this monograph for their personal use oriented towards the increase of their knowledge and who fulfil the condition that they will not use the copy prepared for any professional purpose or for accomplishing material gains, and also that they copy the entire brochure - including the title page, all items, all illustrations, and all enclosures.

Date of the latest update of the web page presented in this brochure is provided above in the top-left corner. (Note that in case of having access to several copies of this brochure, it is recommended to read the copy which has the latest date of amendment.)

This PDF brochure publishes the text of the web page authored by Dr Eng. Jan Pająk, indicated in the title of it. In turn the author's web pages are forms of fast reporting to the readers results of scientific research accomplished by the author of this brochure. The author is aware, that this research, and the results, are unique, as no-one in the entire world undertook earlier research of topics elaborated in this brochure. Therefore ideas which this brochure presents are the intellectual property of the author of this brochure. All ideas, theories, inventions, discoveries, explanations, descriptions, etc., published here, which have documentary or evidential value, are presented accordingly to standards applicable for scientific publications (reports). A special attention the author has given to the requirement of repetitiveness, i.e. that on the basis of this brochure any professional scientist or hobby investigator who would like to verify, repeat, or extend the author's research should be able to recreate his work and arrive at the same or very similar results and conclusions.

This brochure is another one from a series of similar brochures in PDF, offered free of charges to interested readers through the totaliztic web page named [text 11.htm](#) - which disseminates PDF versions of most significant and most widely read web pages by the author. The topic of this brochure is represented also in the newest [monograph \[1/5\]](#) with following editorial details:

Pająk J.: "Advanced Magnetic Devices",
Monograph, Wellington, New Zealand, 2007, 5th edition,
in 18 volumes, ISBN 978-1-877458-01-9.

Contact addresses to the author valid in 2013 – i.e. during the preparation of this brochure:

[Dr Eng. Jan Pająk](#)

Email: janpajak@gmail.com

We live in scary times. Increasingly more people are dying from viciously raging hurricanes, tornadoes, earthquakes, tsunami waves, avalanches, landslips, and mudslides, buildings collapses, downing of airplanes and space shuttles, unnecessary wars, immorality and crimes spreading amongst people, etc., etc. Atheists tell us that all these are outcomes of warming up the Earth's climate and excessive burning of fossil fuels. In turn believers suspect that all these are punishments of God for immorality and godlessness that increasingly more brazenly prevail on the Earth. On the other hand, all facts indicate that the truth looks quite different. Namely, there is increasingly voluminous body of evidence that in reality all these cataclysms and disasters so intensely destroying our civilisation are caused technologically by purposefully created "simulations" of secretive and deadly enemies of humanity. The goal of these "simulations" is to help the humanity through meaningful illustration to what leads the technical development carried out without the simultaneous "moral development" - as this is explained in items #L1 to #L5 from ther web

page named [magnocraft.htm](#). Therefore these "simulations" of deadly enemies of humanity pretend that they are upset by the technical advancements which they see lately on the Earth. Thus, in a perfectly masked manner these "simulated" enemies act on the Earth as if they are trying to destroy our technical advancement. This web page documents, that one kind of cataclysms that lately are persecuting the humanity, namely several excessively destructive hurricanes (also called cyclones or typhoons), displays attributes of being induced technologically by "simulations" of these deadly enemies of the humanity - similarly as the same kind of technologically induced attributes display also destructive [tornadoes](#).

Part #A: Introductory information of this web page:

#A1. What are goals of this web page:

The goal of this web page is to present to the reader the body of evidence for a technical (non-natural) origins of several most destructive hurricanes. The page also tries to explain how these destructive hurricanes (also called cyclones or typhoons) were induced technically, and who secretly unleashed their destructive power and directed them onto areas that these hurricanes destroyed.

This web page provides also an extension, addition, and empirical illustration

of correctness, for another web page named [hurricane.htm](#), on which I explained thoroughly how hurricanes are formed technically by vehicles which I invented in 1981 and named [Magnocrafts](#) - attributes of which are "simulated" by UFOs.

#A2. Notice that in order to concentrate of explaining matters included into the topic of this web page, a simplification was introduced which is described in item #F1 near the end of this web page:

This web page is devoted to the discussion of hurricanes, not e.g. UFO vehicles, or e.g. reasons for which all more murderous "Acts of God" are always so "simulated" as if they were secretly generated by UFO vehicles - as this is explained in item #C2 from the web page named [tornado.htm](#), and in items #C2, #D4, #J1 from the web page named [day26.htm](#). Therefore, in the content of this web page omitted is the full discussion of "simulations" referred in item #F1 near the end of it.

Part #B: The mechanism of formation of hurricanes:

#B1. The mechanism of formation of hurricanes on the Earth:

On a separate web page [dipolar gravity.htm - about the Concept of Dipolar Gravity](#), and also in chapters H and I from volumes 4 and 5 of [monograph \[1/5\]](#), a new scientific **theory of everything** named the "Concept of Dipolar Gravity" is described. **This theory explains, amongst others, mechanisms behind formation of hurricanes**, climate changes, drift of continents, etc. The Concept of Dipolar Gravity is already quite well known, as it is disseminated in a number of publications and web pages. The most comprehensive, and also most recently updated, description of this concept is presented in chapters H and I of the monograph [1/4] "Advanced magnetic devices". (Free copies of monograph [1/4] can be downloaded via this web page.) In turn a brief summary of this concept is presented on several web pages, for

example on web pages about "[totalizm](#)", "[free energy devices](#)", and "[telekinesis](#)".

Because the reader may not be familiar with the Concept of Dipolar Gravity, I summarize it briefly here. However, the presentation of such a complex scientific theory in just a few words, requires making numerous **short cuts**. In turn these short cuts inevitably compromised consistency and integrity of the presentation. Therefore, I would suggest, that if you have doubts about some components of this theory, instead of relying just on the brief descriptions provided here, you can read the full description of these components provided in chapter H from volume 4 of monograph [1/4], which is available for free via "Menu 1" and "Menu 4".

In general, the **Concept of Dipolar Gravity** succeeded with proving formally, that the gravity field belongs to a dipolar type of fields, not to a monopolar one - as it is commonly believed by our orthodox scientists. In turn, the dipolar character of gravity field must mean, that gravity behaves like every other dipolar field, e.g. like magnetic field, or like dynamic dipolar fields caused by flows of hydraulic (or pneumatic) media. Thus in practical terms, according to the Concept of Dipolar Gravity, we are able to observe only a half of force lines of gravitational field. The second half of these force lines of gravitational field disappears behind an invisible boundary, and reappears in a different world. So one of consequences of dipolar gravity is, that the universe is composed of two different worlds, which are mutually separated from each other by an invisible boundary. With our senses we only see the first of these two worlds, namely our "physical world". But gravity forces lines pass through the invisible boundary that separates both worlds, and they enter this second world - called the "counter-world". In this way every particle of matter which exists in our physical world, is balanced via gravity forces with a similar particle of "counter-matter" which exists in this other "counter-world".

In subsection H2 from volume 4 of monograph [1/4] it is explained, that **counter-matter existing in the counter-world** displays attributes exactly opposite to properties of matter from our world. For example, it displays "self mobility" instead of "inertia", and also it completely lacks friction (i.e. is "super-slippery"). In turn because of this lack of friction and because of self-mobility, this substance **is unable to create nor maintain solid objects**. So counter-matter from the counter-world is in the state of continuous motion at all times. However, the spinning motion of this counter-matter, in a manner similar as spinning motion of water, is able to form semi-permanent structures. In subsection H4.2 from volume 4 of monograph [1/4] these structures are described under the name of "**whirls**". Such whirls are actually semi-permanent structures, which on the other end of gravity dipoles balance every solid object from our world. In the counter-world there is a whole range of such whirls of counter-matter. Some of them are so miniature, that they represent and balance individual particles and atoms. Other are so huge that they duplicate and balance whole planets, solar systems, and even galaxies. Thus, for example, our entire planet, the atmosphere of Earth, as well as e.g. all oceans, in the counter-world are duplicated and gravitationally balanced with a multitude of such gigantic whirls of counter-matter. If somehow we could have insight into the counter-world, we would see our Earth just as a dynamic bundle, or knot, made of such huge spinning whirls of counter-matter. In addition, this bundle of whirls is frequently crossed by linear streams of counter-

matter. What is even more interesting, these whirls and streams of counter-matter, which in the counter-world balance the mass of our planet, are intertwined in a single complicated bundle with similar whirls of counter-matter which in the counter-world balance the mass of Sun, Moon, planets, etc. Therefore almost all events and phenomena on Earth, especially weather phenomena, are depending on movements and positions on our sky of the Moon, planets, Sun, etc. (for a long time this is being told to people by a discipline of knowledge called "**astrology**").

Each whirl of counter matter is formed into an approximate shape of a "donut". This means that the whirls of counter-matter always assume the shape of closed loops. Illustratively they could be compared to **gigantic "snakes"** which spin around axes of rotation that run along their spinal cords, while with their mouths they bite ends of their own tails - so they are formed into closed loops. Only that instead of flesh, these "snakes" are formed from counter-matter, means from this extraordinary substance which prevails in the separate counter-world. (The "**counter-world**" is another world which so-far was described only by religions, as before the Concept of Dipolar Gravity there was no consistent physical theory that would justify the existence of it.) If such large whirls of counter-matter pass through the Earth's atmosphere, their gravitational interactions intercept and move particles of the air. In this way they create in the atmosphere huge circulations of the air called "low pressure areas" or "high pressure areas". Our "mother Earth" has a strict and always the same number of such large whirls of counter-matter. They never disappear, nor are created. Just constantly change their position in relationship to the surface of Earth. Furthermore, they also keep changing their own diameter around which their counter-matter spins (means their diameter "pulsates" cyclically, i.e. it periodically increases and then decreases).

Such huge whirls and streams of counter-matter constantly penetrate through our planet, getting in and out of Earth at various hemispheres. Actually, they are the ones which govern all atmospheric phenomena and all ocean currents on our planet. Thus practically they decide about the weather and climate of each single area on our planet, e.g. tornadoes, cyclones, anticyclones, hurricanes, ocean currents, and all other changes in fluids (including the so called "jet stream" - means a powerful westerly wind that blows at huge altitudes). When we learn how to control these whirls of counter-matter, we also learn how to control weather and climate on Earth. This is the reason why in this item of the web page I described the mechanism of interactions between these whirls of counter-matter and the Earth's atmosphere.

There are two basic kinds of such whirls of counter-matter. We could call them: "**low-pressure whirls**", and "high-pressure whirls". The factor, which differentiates each one of them from the other one, is the course and effects of the physical phenomena that takes place during the spin of these whirls. The first kind of these whirls releases the phenomena that maintain a distribution of pressure within the whirl, which is lower in the centre of whirls and higher on peripherals and in the surrounding of the same whirls. Therefore these can be called the "low-pressure whirls", as the way they spin lowers the pressure inside of them. In turn the other kind of whirls release physical phenomena which maintain a distribution of pressure that is higher in the very centre of these whirls

and lower on their peripherals and in their surroundings. Therefore these can be called the "**high-pressure whirls**", as the way they spin causes the build up of high pressure inside of them. Both these opposite types of whirls of counter-matter mutually attract each other. Therefore in the counter-world they appear either in pairs, or even in strands. If they appear in a pair, one low-pressure whirl sticks sideways to an identical in size high-pressure whirl. In turn if they appear in a strand, then one low-pressure whirl sticks side-by-side to a high-pressure whirl, which in turn sticks side-by-side to a low-pressure whirl, and so-on. All climatic and weather phenomena are controlled by pairs or strands made up from such opposite kinds of huge whirls of counter-matter. Only sometimes these whirls are supplemented with another phenomenon, which in the counter-world takes the form of dynamic (linear) streams of counter-matter (e.g. consider the so-called "jet stream" running in an opposite direction than it should - if it is really propelled by the rotation of Earth).

When such gigantic whirls of counter-matter penetrate through the centre of our planet, then in areas where they emerge to the surface they cause the rotation of winds around their central axes. This winds are generated because whirling counter-matter interacts via gravity forces with particles of the air. Thus, for example "low-pressure whirls", acting through gravitational forces onto particles of air, form areas of low atmospheric pressures on Earth. Such areas of low pressure are easy to recognize e.g. on TV, because around them in the northern hemisphere of Earth winds always rotate counter-clockwise. In turn in the southern hemisphere of Earth winds rotate around them in the clockwise direction. (This clock that is used to describe the direction of rotation of these winds must lie with its back on the ground and with its dial always directed towards the sky.) Furthermore, such low-pressure areas always bring bad, rainy and windy weather.

The Concept of Dipolar Gravity also explains that due to a very similar mechanism, high-pressure areas are formed on Earth. The only difference is that they are caused by "high-pressure whirls of counter-matter", which control the behaviour of these high-pressure areas. In television presentations one can recognize these high-pressure areas mainly because the winds that they create circulate in directions that are opposite to those in the low-pressure areas, means in counter-clockwise directions on the southern hemisphere of Earth, while in the clockwise direction in the northern hemisphere of Earth. Furthermore, the attribute of these high-pressure areas is that they bring good and sunny weather. Thus in their centres always prevails an excellent, cloudless weather, which shows blue sky from the horizon to horizon.

Independently from acting upon atmosphere, the same and similar whirls of counter-matter, as well as linear streams of this substance, act upon oceans. In the final effect, all global phenomena which take place in oceans, can be explained with such whirls and streams of counter-matter.

There is an interesting consequence of explaining low-pressure and high-pressure areas on Earth as huge whirls of counter-matter curved into loops, penetrating through the centre of our planet, and swirling the air at both exit points. This explanation **indicates a simple manner for the control of weather on Earth**. For example, according to this manner, all that it takes to change the weather, is to intercept such a whirl of counter-matter and then relocate this whirl

into another area. (Such an interception and relocation of whirls of counter-matter can be accomplished for example with a large UFO vehicle, or by a vehicle propelled by a magnetic field which in chapter F from volume 3 of monograph [1/4] is described under the name of “magnocraft”.) In turn this relocation of a whirl must cause the change of weather in all areas affected by it. Even more interesting is that such huge whirls of counter-matter can also be narrowed down to just several (or a hundred) meters. In case of such narrowing down of a small low-pressure whirl, the normally slow moving air that is propelled by this whirl accelerates significantly and receives huge velocities and power. As a result, such “squeezed” whirl forms a tornado. In turn, when a huge low-pressure whirl is narrowed down to a relatively small diameter, then a hurricane is formed. Therefore, **the name "hurricane", "cyclone", or "typhoon" is assigned to a powerful spinning wind generated when a low-pressure whirl of counter-matter is squeezed somehow, e.g. by a magnetic field of a UFO vehicle, to a relatively small diameter.** Tornados and hurricanes, similar to low and high pressure areas on Earth, can be induced and controlled technically with large vehicles propelled by magnetic field (i.e. UFOs and Magnocraft).

At this point I should mention that trajectories, along which such low-pressure and high-pressure whirls of counter-matter are moving along the surface of our planet, depend on the consistency of the nucleus of Earth. The reason is, that such **whirls of counter-matter are able to move more easily while passing through Earth along paths where the nucleus of our planet is less compact, or have cracks of some sort.** In turn, this tendency of the whirls to move along specific trajectories, cause that low-pressure and high-pressure areas on Earth, as well as tornados and hurricanes, follow usually the same paths. This is why in specific areas of the USA, the so-called "tornado alley" does exist. Also because of this, e.g. in Poland tornados are rarities, while bad weather always seem to arrive there along the same path starting in Finland and passing through Latvia. In turn in New Zealand and Australia, paths of bad and good weather always seem to follow a kind of “zigzag” pattern which begins in the vicinity of Perth in Australia, goes down to Adelaide and Tasmania, then curves to New Zealand.

Fig. #B1ab: The illustration which explains the basic difference between hurricanes, cyclones, or typhoons formed naturally on the northern hemisphere of the Earth (see the left photograph "a"), and similar hurricanes, cyclones, or typhoons formed naturally on the southern hemisphere of the Earth (see the right photograph "b"). It is worth to notice, that this basic difference will always appear, no matter which natural hurricanes, cyclones, or typhoons one is going to analyse - as an example [check illustrations of any e.g. cyclones which can be found e.g. in google.com](https://www.google.com) and relate these to the hemisphere of the Earth on which they appeared. Namely the natural hurricanes, cyclones, or typhoons formed on the northern hemisphere of the Earth (see the left photograph "a"), always spin counter-clockwise - i.e. always in the direction which is opposite to the motion of pointers in a clock. In turn hurricanes, cyclones, or typhoons formed on the southern hemisphere of the Earth (see the right photograph "b'), always spin clockwise - i.e. always in the direction which coincides with the motion of pointers in a clock. The reason for such difference in the direction of their spin is the fact that on both hemispheres of the Earth these natural winds are formed through squeezing (narrowing down) of the same "low-pressure whirls of counter-matter". In turn these "low-pressure whirls of counter-matter" can be compared to huge "snakes" that rotate around their axis, while simultaneously they penetrate throughout the entire our planet (this is why all natural hurricanes, cyclones, or typhoons always appear in pairs - means one on the northern hemisphere and another one on the southern hemisphere). Therefore in place where these "snakes" enter the Earth on the northern hemisphere, they always form the counter-clockwise winds. In turn in areas where these "snakes" emerge from the Earth in the southern hemisphere, they always form clockwise winds. It is worth to notice, that in exactly the same manner

spin also tornadoes. After all, tornadoes are just hurricanes (low-pressure whirls of counter-matter) that are still narrowed down even more. (Note that similarly like hurricanes, also tornadoes can be formed technically by UFO vehicles.)

Of course, this difference in the direction of spinning limits itself exclusively to hurricanes, cyclones, or typhoons that were formed naturally. After all - as this is explained in the further part of this web page on the example of the cyclone "Nargis" from "Fig. #E1", if these powerful winds are induced technically by UFO vehicles or by the Earthly Magnocrafts, then these winds are able to spin in practically any direction. This is because UFO vehicles and Magnocraft have the capability to drag them onto different hemispheres, and also to increase their natural spinning motion in any direction.

Fot. #B1a (left): An example of the appearance of a counter-clockwise (i.e. spinning in the direction opposite to the motion of clock's pointers) hurricane, cyclone, or typhoon, means a hurricane, a cyclone, or a typhoon that was formed naturally on the northern hemisphere of the Earth. The above photograph shows a counter-clockwise cyclone which attacked Oman. More on its subject in May 2008 was possible to read on the web page http://www.jeffsweather.com/archives/2007/06/tropical_cyclon_2.html. Of course, in order to notice its counter-clockwise spinning and the general appearance, it is enough to have a look at a satellite photograph of practically any other cyclone from the northern hemisphere of the Earth which can be found e.g. in illustrations from the google.com.

Fig. #B1b (right): An example of the appearance of a clockwise (i.e. spinning in the direction that coincides with the motion of clock's pointers) hurricane, cyclone, or typhoon - means a hurricane, a cyclone, or a typhoon that was formed naturally in the southern hemisphere of the Earth. The above photograph shows the clockwise cyclone named "Ingrid", which attacked Darwin in Australia. More on its subject in May 2008 was possible to read on the web page <http://www.smh.com.au/news/National/Bigger-than-Darwin-experts-alarm-as-cyclone-nears/2005/03/08/1110160807899.html>. Of course, in order to notice its clockwise spinning and the general appearance, it is enough to have a look at a satellite photograph of practically any other cyclone from the northern hemisphere of the Earth which can be found e.g. in illustrations from the google.com.

* * *

Notice that you can see the **enlargement** of each illustration from this web site. For this, it suffices to **click** on this illustration. Furthermore, most of the internet browsers that you may use, including the popular "Internet Explorer", allow also to **download** each illustration to your own computer, where it can be looked at, reduced or enlarged to the size that you may want, or printed with your own graphical software.

#B2. Evidence which confirms the actual

work of the above mechanism of hurricanes and tornadoes formation:

In spite that the entire Concept of Dipolar Gravity, and also relationship between weather and whirls of counter-matter, were deduced theoretically, I have managed to accumulate a number of empirical observations, which seem to confirm that this theory is sound and that it well reflects reality. Amongst various observations that confirm this theory, the following ones are the most striking:

(1) The consistency of the rotation of low-pressure and high-pressure whirls on both hemispheres. If one analyses how the air rotates within the low and high-pressure areas on opposite ends of our planet, it turns out that they rotate exactly in the manner as they should if they are propelled by whirls of counter-matter which penetrate through the centre of Earth.

(2) The rotation of clouds in the same direction at every height above the ground. If hurricanes, and also low pressure and high pressure weather systems, are governed exclusively by winds and by the motion of atmosphere, then sometimes there would be situations, that at centres of such weather systems clouds would move in mutually colliding directions at various heights above the ground. However, in reality at such weather centres clouds always rotate in the same direction at every possible height. This in turn confirms the correctness of the weather mechanism described here.

(3) The correspondence between attributes of tornados and hurricanes and the mechanisms described in this item. For example, both tornados and hurricanes are always swirling counter-clockwise in the northern hemisphere and clockwise in the southern hemisphere, means exactly in the manner as if they are narrowed down (squeezed) low-pressure whirls of counter-matter which penetrate through the centre of Earth.

(4) The even number of hurricanes on Earth. Since, according to the theory described here, e.g. hurricanes are simply narrowed down (squeezed) low-pressure whirls of counter-matter, which penetrate through the centre of Earth, then if any natural hurricane attacks e.g. the coasts of eastern parts of the USA, another similar natural twin-hurricane should appear in Southern Pacific. And actually satellite pictures confirm this. But because this opposite-end natural twin-hurricane usually passes then through the ocean, it is rarely shown in TV news and reported to the public.

(5) Repetitive paths of low-pressure and high-pressure areas along the surface of Earth. My empirical observations indicate, that in the majority of normal cases, both these areas behave exactly as the above theory explains their behaviour. For example, they repetitively follow the same trajectories along the surface of Earth - which correspond to cracks and inconsistencies of our planet.

(6) The lack of disappearances of old, and the lack of appearances of new, high-pressure and low pressure circulations of the air. If these high-pressure and low-pressure circulations of the air were just purely atmospheric phenomena, than in situations when the pressure of air inside of them becomes equal to the pressure of air outside of them, they supposed to disappear.

However, in reality they never disappear nor are newly created, but only move along the surface of our planet and keep changing their pressure and shape. This in turn means, that if their pressure becomes equal with the surrounding pressure, still there is something in them that maintains their existence. This something is the whirl of counter-matter invisible for us which constitutes their nucleus and a kind of skeleton.

(7) The constant number of low pressure and high-pressure areas on Earth. I do not have means and resources to count the number of these areas in a global scale. However, the high regularity of weather cycles at the southern end of the Earth confirms that this number must be constant. For example, in New Zealand the weather follows a repetitive cycle, the length of which is around 7 days and 9 hours. This means that if we consider any place in New Zealand, in normal situations around every 7 days and 9 hours, a high-pressure area repetitively arrives to this place. What is even more interesting, because in the dipolar gravity the southern pole of Earth represents the "outlet" for counter-matter, the weather cycles are incomparably more repetitive in New Zealand than in the Northern Hemisphere of the Earth. (Definitions of N and S magnetic polarity provided in subsection H5.2 from volume 4 of monograph [1/4] explain also why in the Concept of Dipolar Gravity the planet Earth is seen as a huge pump for counter-matter, which has an "inlet" at the N pole, and an "outlet" at the S pole.)

#B3. Practical utilisation of the mechanism of formation of hurricanes and tornadoes described here:

Although the theory presented in this item of the web page may seem to be highly academic and theoretical, it actually indicates a direction in which numerous practical applications of it can be accomplished. For example, it allows for a more effective weather forecasting. It enables us to prepare more precise models of climate changes on Earth. It indicates the way of controlling weather and controlling various atmospheric phenomena (e.g. tornados and/or hurricanes). It also provides clues on how to create early warning systems e.g. against tornados and hurricanes.

Part #C: Principles of technological induction of hurricanes, cyclones, or typhoons by UFO vehicles:

#C1. UFOs do exist objectively and are interstellar spaceships that continually hide from humans:

On the separate web page [ufo_proof.htm - with the formal scientific proof for the existence of UFO vehicles](#), it was conclusively proven that the interstellar spaceship popularly called "UFOs" do exist objectively and are built by cosmic civilisations which differ from our one, and that these vehicles continually operate on the Earth - only that they do it secretly (i.e. always cautiously hiding from people). That formal scientific proof for the objective "existence of UFO vehicles" is additionally reinforced by the scientifically verified and interpreted evidence for the existence of UFOs, which is presented on a whole range of [totaliztic](#) web pages, e.g. on the pages [evidence.htm - about the body of evidence for continual activities of UFOs on the Earth](#), [explain.htm - about scientific interpretation of UFO photographs](#), or [aliens.htm - about scientific interpretations of photographs of UFOonauts](#).

#C2. UFOonauts are sworn enemies of humanity and continually act to the detriment of people:

On the separate web page [evil.htm - about origins of all evil on the Earth](#), it was proven in a logical and illustrative manner, that UFOonauts (means owners of spaceship popularly called "UFOs") are sworn enemies of the humanity, whom from the beginning of time secretly occupy, rob, exploit, and destroy the humanity. The logical deductions and evidential documentation of that web page is additionally reinforced by the scientifically verified and interpreted evidence for the hostile activities of UFOonauts on the Earth, which is presented on a whole range of [totaliztic](#) web pages, e.g. on the pages: [military_magnocraft.htm - about military and destructive capabilities of UFO vehicles](#), [tornado.htm - about tornadoes induced technically by UFOs](#), or [landslips.htm - about avalanches, mudslides, and landslips released technically by UFO vehicles](#).

All methods of killing and tormenting the humanity that are utilised by UFOonauts, are so designed that they appear to be just natural catastrophes and unfortunate events. But in fact these are just technically induced catastrophes by the advanced technology of UFOonauts which still remains unrecognised by the human science. To the most frequently used by UFOonauts manners of killing of large numbers of people, belong amongst others the technically induced [tornadoes](#), [avalanches](#), [landslides](#), and [landslips](#), [tsunami waves](#), [collapses of building with the use of magnetic forces](#), [downing of our airplanes and space shuttles](#), [spreads of epidemics and illnesses](#), and also the described

on this web page [hurricanes](#) induced and controlled technically by UFO vehicles.

#C3. How UFO nats form technically destructive hurricanes (e.g. to secretly destroy with them present human civilisation):

An interesting consequence of the above explanation of low-pressure and high-pressure air circulations on Earth, as huge whirls of counter-matter formed into closed loops and penetrating through the entire our planet, is that it indicates a simple **manner of controlling the weather and climate**. After all, in order to induce or relocate hurricanes according to the mechanism described here, it is enough to catch such a whirl of counter-matter and either narrow it down - thus increasing the velocity of its rotational motion, or drag it to another place - thus shifting such a hurricane to the area where it supposed to cause a destruction.

Such an ability to narrow down or to shift a whirl of counter-matter have UFO vehicles. This is because UFO vehicles work on exactly the same principle as the earthly spaceships called [magnocraft](#), about which we know perfectly well that it is going to be able to control weather in the manner described here. How exactly these UFO vehicles and [magnocrafts](#) induce and shift hurricanes, it is described on a separate web page [hurricane.htm - about technological formation of hurricanes](#) (partially also on the web page [tornado.htm - about tornadoes formed technically by UFO nats](#)). On this web page here I am going to only present a drawing which illustrates picturescly how this is carried out. Here is this drawing:

Fig. #C3: One amongst many possible configurations of force lines of magnetic field around a magnocraft (and also a UFO). These force lines actually provide a tool with the use of which an effective control over weather and climate can be accomplish. This is why such a magnocraft (or a UFO) can easily e.g. create or disperse hurricanes and tornados, bring sunshine or rain, etc., etc. It is easy to notice that in the configuration shown above these force lines create a kind of colossal "magnetic catcher" (or a "funnel") which is able to intercept a whirl of counter-matter and subject this whirl to controlling activities (e.g. direct this whirl through the vehicle's main propulsor). In subsection F5.3 from volume 3 of [monograph \[1/4\]](#) was proven, that the physical dimension of such a "magnetic catcher" for every magnocraft (or a UFO) always exceeds at least 1000 kilometres. So it easily catches even the largest whirls of counter-matter which affect the weather and climate of Earth. Notice that the outline of a vehicle which forms the magnetic field shown on this Figure is indicated with a dotted line. This vehicle is illustrated in the "standing position". Please notice that principles of operation involved in flights of such magnetic vehicles, as well as their main components, are described on web pages on [magnocraft](#) available via "Menu 2" and "Menu 4".

The above Figure clearly illustrates, that by appropriate control over the output from subsequent propulsors, each magnocraft (and UFO) is able to form a kind of "magnetic catcher" (or "funnel") around itself. In turn such a "magnetic catcher" is capable of intercepting a local whirl of counter-matter, and then force this whirl to subdue to all controlling actions to which the vehicle wishes to subject it. For example, if these actions depend on narrowing the whirl down - squeeze it through the clearance of main propulsor of the magnocraft (in turn, the squeezing of this whirl of counter-matter through the main propulsor of that magnocraft, narrows it down to the diameter of that propulsor, forcing in this

manner the extremely fast rotation of the whirl and forming a tornado from it). Of course, by appropriate changes in outputs of propulsors, each magnocraft is also able to form a kind of "umbrella" from force lines of its magnetic field. In turn such an umbrella is going to disperse and expand the whirl of counter-matter in the interior of which it is placed.

The above Figure originates from [monograph \[1/4\]](#), in which it is discussed as Figure F32. Notice, that copies of monograph [1/4], together with a complete set of Figures that it contains, are disseminated free of charge via this web page, and also via all other web pages listed in the "[Menu 4](#)".

#C4. How to defend ourselves against hurricanes (cyclones, typhoons) formed technologically by UFO vehicles:

Although our civilisation did not worked out, as yet, the method of dispersing a hurricane (cyclone or typhoon), still it is NOT completely defenceless against these secretive attacks of UFO-nauts. One amongst best methods of defence against these attacks, is to use [karma](#). According to what was explained on the web pages "[plague.htm - about plagues brought at the humanity by UFO-nauts](#)" and "[day26.htm - about tsunami on the 26th day](#)", with our common effort we are able to cause, that the karma for suffering inflicted by a given hurricane (cyclone or typhoon) is charged onto UFO-nauts. People can also cause, that this karma is to be released almost instantly. Therefore a method of self-defence against secretive attacks of UFO-nauts onto the humanity with the use of destructive hurricanes (cyclones or typhoons) that is available to us already now, is the wide dissemination of the true information about these destructive events, and about the participation of UFO-nauts in forming these. This in turn means, that **in order to defend the humanity against hurricanes (cyclones and typhoons) induced technologically by UFO-nauts, it is necessary to inform as many people as possible, that these are UFO-nauts who are responsible for causing these destructive events.** In order to be able to convince people about this fact - instead of just informing them, it is also necessary to explain what is the mechanism of the technical formation of hurricanes (and also [tornadoes](#)) by UFOs, and to indicate to people the body of evidence which documents that in fact specific hurricanes were induced technically by UFOs - means to briefly repeat to people exactly what this page is explaining. In turn the dissemination amongst people the constructive knowledge, that these destructive phenomena are formed technically by UFO-nauts, will cause that UFO-nauts begin to receive increasingly larger proportion of karma that will shift onto them suffering caused by these phenomena. This in turn will gradually cool down the enthusiasm of UFO-nauts to form these kinds of destructive phenomena on the Earth.

Of course, independently from the method of group self-defence explained above, against hurricanes is also possible to defend ourselves individually. Such

an individual defence should be carried out according to the saying (which was passed to people by UFOonauts themselves via ancient Romans) that **in order to have peace, one needs to prepare to a war**. In order to explain this in other words, it is necessary to prepare ourselves to the eventuality of an approaching hurricane. In turn principles of such preparation do not differ much from the preparations to an approaching plague described thoroughly on the web page [plague.htm - about plagues brought to people by UFOonauts](#). (The technical device which allows us to detect approaching [hurricanes](#) and [tornadoes](#) is described on the web page [hurricane.htm - about control over winds, hurricanes, weather, climate, etc.](#).)

Part #D: The hurricane "Katrina" of 29 August 2005:

#D1. The hurricane "Katrina" of 29 August 2005 - an example how UFOonauts are able to induce a hurricane as deadly as a tsunami:

Our mental habits lead us straight to a disaster. After all, we used to think, that if human murderers kill in a manner that from a large distance it is recognisable just as a murder, then also murders of UFOonauts must look like these human murders (i.e. from large distances must be recognisable as murders). While thinking like this we forget that UFOonauts have in their disposal all this enormously advanced technology and medicine. So when they use this technology and medicine for murdering people, their murders remain undetectable for us. We believe that a given victim died e.g. for a cancer, or e.g. for a heart attack, or e.g. because of an unfortunate accident, or because his or her house was struck e.g. by a tornado. In order to understand how difficult for identifying and detecting are murders committed by UFOonauts, let us consider the case of mass murder carried out by UFOonauts on 29 August 2005. It took the shape of a hurricane nick named "Katrina" (most probably this loving name was given to it by one of these "changelings" described in item #12 of the web page [predators.htm - about cosmic predators of humanity and their murderous attacks](#) with a report about the course of "Katrina"). This hurricane completely devastated the city of New Orleans in the USA on 29 August 2005. It cost around 1100 human lives. Winds that it induced reached velocities of 240 km/h.

#D2. The body of evidence which confirms that the cyclone "Katrina" of New Orleans was induced technically by UFO vehicles:

If one analyses the hurricane "Katrina", then it turns out that it displayed all attributes of the hurricane induced technologically by UFO-nauts. Let us remind ourselves here some of these attributes:

(i) **The hurricane Katrina was following a non-typical path on which no hurricane was recorded since the Camille of 1969.** (This Camille most probably was also induced technologically by UFO-nauts.) Hurricanes, similarly as all other low-pressure whirls, have their own trajectories which they follow during their motion along the surface of Earth. These trajectories are depending on the internal structure of the Earth's nucleus. The cracks and less dense areas in this nucleus define the trajectory of the whirls of counter-matter which cause hurricanes and tornados. Therefore, in normal cases, low-pressure whirls of counter-matter, and also hurricanes which are induced by these whirls, move at the surface of Earth along specific and usually the same trajectories. But these low-pressure whirls can be grabbed and shifted to different locations with the magnetic field of a large UFO vehicle. UFO-nauts utilise this capability of their vehicles, to shift hurricanes at such areas of Earth, which they intend to destroy in a given moment of time. More information about the mechanism that governs such low-pressure whirls, and manners they can be controlled with huge UFO vehicles, is provided on web pages about [tornados](#), listed in "Menu 4".

(ii) **It was accompanied by extraordinary weather anomalies. Even people that are not familiar with technology of UFO-nauts, recognised these anomalies as signs of a technologically induced hurricane.** For example, on 11 September 2005, on the web page <http://www.flashnews.com/news/wfn1050908J5463.html>, an article was published entitled "Weatherman Claims Japanese Mafia Behind Hurricane Katrina". (a Polish version of the same article entitled (in Polish) "Japońska mafia odpowiedzialna za Katrinę?", was published on the web page wiadomosci.onet.pl/1161610,69,item.html?MASK=14177212. This article reports a conclusion from research of Katrina by the American meteorologist, Scott Stevens from Idaho. This meteorologist also stated, that after analysing satellite photographs of Katrina he is sure, that this hurricane was induced technologically. So the only difference between his and mine findings, is that he suspects Japanese Mafia for causing this hurricane. (Note however, that even if he knew for sure that UFOs induced this hurricane, still probably for his own security he would point at the Mafia. After all, the use of the word "UFO" in his statement would have such a consequence that his employer most probably would sack him from the job - similarly as my employers [dismissed me](#) already several times in response for my "too open" in their opinion disclosure of the occupation of Earth by UFOs.) Here is a quotation taken from the above article, which points our attention at the extraordinary character of this hurricane, which certifies for its technological origin. Quote: "... clouds formed by the generators are different than normal clouds and are able to appear out of

nowhere and says Katrina had many rotation points that are unusual for hurricanes. ..." Please notice that the last sentence reveals that in order to generate this hurricane UFO-nauts used several large UFO vehicles magnetically coupled together into a flying cluster. The cluster of UFOs maintained the hurricane cooperatively. This is the reason why there was a number of separate rotation points noticed by this American meteorologist. Notice also that the differences in the appearance of clouds formed technologically, and the appearance of natural clouds, is illustrated on the web page on [cloud-UFOs](#) available through "Menu 4" and "Menu 2".

(iii) It did not have own anti-hurricane. In subsection H5.4 from volume 4 of monograph [1/4], and also on totaliztic web pages which describe the mechanism of technical inducing of [tornados](#), I explained that tornados and hurricanes are created due to a narrowing down (squeezing) so-called "low-pressure whirls of counter-matter". These whirls are like huge spinning "snakes" made of counter-matter and penetrating throughout the body of our planet. So if any of them is naturally narrowed down (i.e. it decreases by itself the diameter of spinning) then this narrowing down reveals itself simultaneously on both hemispheres of Earth, in places where this spinning "snake" of counter-matter emerges from the ground. Therefore **all natural hurricanes always appear in pairs**. If one hurricane from such a pair attacks e.g. the USA, then the mirror copy of it simultaneously appears on the southern Pacific Ocean and rages along an empty ocean. However, because these mirror reflections of American hurricanes rage in the middle of relatively empty ocean (i.e. Pacific), only extremely rarely they are illustrated in TV or described in newspapers. But they always do exist and always can be spotted on satellite photographs of Earth. (Such photographs can be found in internet, e.g. on the web page www.ghcc.msfc.nasa.gov/GOES/.) In turn when a hurricane is induced technically, as this was the case with Katrina, then it does NOT have its own anti-hurricane on the southern Pacific. The lack of this anti-hurricane on the opposite side of Earth is the confirmation that the Katrina was not natural at all, but was induced technologically by UFO-nauts.

(iv) It intelligently changed the trajectory. It behaved in such a manner as to cause possibly the greatest damage through blocking the exist from the river Mississippi.

(v) It intelligently changed the intensity and pressure. For example, shortly before it attacked the coast, it decreased the intensity to calm down people and to decrease the number of evacuees. But just before it attacked, it increased the intensity again. This in turn documents that it was controlled intelligently.

(vi) It was accompanied by numerous tornados. In turn the mechanics and attributes of these tornados quite clearly reveal that they were induced technologically by UFOs. The mechanics of formation of tornados by UFOs is explained on several web pages [tornado.htm - about technological formation of tornadoes by UFO vehicles](#). These web pages indicate also extensive evidence which documents the actual origin of tornados and hurricanes from UFOs.

(vii) In slightly over three weeks later, i.e. on 24 September 2005, UFO-nauts send along the path of Katrina another technically induced

hurricane named "Rita". The main goal of Rita was to eliminate suspicions that Katrina was caused technically by UFOnavts. UFOnavts always place huge emphases onto the diverting out from themselves the peoples' suspicions that these were them who caused a given disaster. One of methods of diverting this suspicion, that they frequently use, is to cause again the same disaster, but this second time UFOnavts make it to appear to be "unsuccessful". For example, in two weeks after a "successful" bombing of London on 7 July 2005, UFOnavts repeated the bombing of London on 21 July 2005 - but this time they make it look as if it was "unsuccessful". Exactly the same trick UFOnavts repeated with hurricanes Katrina and Rita. For the fact, that also Rita was induced technically by UFOnavts to prove that previously Katrina was a "natural" disaster, certifies a number of attributes of Rita, e.g. that: (1) Rita followed almost the same non-typical trajectory as Katrina, (2) it also had NO its "twin" anti-hurricane on the southern Pacific, (3) in order to fabricate an anti-hurricane for Rita, simultaneously with Rita UFOnavts induced a technological typhoon "Damrey" which hit southern China and Vietnam - however, this typhoon for sure was NOT the anti-hurricane for Rita because similarly to Rita it was spinning anti-clockwise, (4) Rita was also accompanied by numerous tornados, (5) it also was displaying non-typical (i.e. intelligent and technological) behaviours and attributes, (6) the action of Rita was corresponding exactly to the general strategy and methods of UFOnavts, etc., etc.

(viii) The hurricane Katrina was synchronised by UFOnavts with a whole range of other destructive activities, which UFOnavts typically "arrange" during their attacks on humanity. Examples of other such destructive events which UFOnavts have arranged for, were robbery and looting of shops in New Orleans, chaos, disorganisation and slow action of authorities, four-days long lack of any assistance from outside (as if it was intentionally delayed by agents of UFOnavts in order to increase the destructive impact of this hurricane), shootings, rapes and lawlessness, bandit snipers on roofs of houses murdering innocent passers by, horrifying activities of dragged gangs, engineering errors which allowed water to break through dams to New Orleans, etc., etc. In total, this perfectly carried out by UFOnavts action of deepening the crisis caused by the hurricane, turned this relatively simple attack of UFOnavts into a large crisis of America. After-hurricane hidden sabotages of UFOnavts caused the non-repairable damage to Americans in moral and propaganda areas.

(ix) This hurricane added to a whole array of various recent attacks of UFOnavts on the USA. Lately UFOnavts continually carry out such attacks on this leading country of our civilisation. They jolly well know that eyes of the entire planet are directed on America. Thus whatever bad happens to Americans, in fact it causes the pain and harm to every citizen of our planet. UFOnavts know that if they manage to destroy the USA, they also manage to destroy the entire our present civilisation.

The hurricane Katrina was not the only hurricane which UFOnavts moved at the target which they intended to destroy. I watch with the interest all destruction caused lately by the weather and climate. Out of this destruction quite clearly emerges that hurricanes and destructive winds are only a next tool of destruction in an entire arsenal of such weaponry which UFOnavts unleashed lately against

our civilisation. (A complete list of all these weapons is provided in item #4 from the separate web page named "[predators](#)" .) The most convincing example, how UFO-nauts for every their wish are able to cause a hurricane, I experienced myself on 28 November 1998 - when I went onto an expedition to search for the legendary "**sleeping giant**" from New Zealand. (This "sleeping giant" is a gigantic sculpture of a human giant, carved in an entire mountain, which according to legends of New Zealand Maoris, supposed to exist perfectly hidden and undiscovered by Europeans until today, in dense bush of New Zealand native forests. The giant is described in subsection V3 from volume 16 of monograph [1/4].) This expedition, and the hurricane intentionally induced by UFO-nauts which made me abandon the searches for the giant sculpture, is described in more details in subsection VB4.4.1 from volume 17 of monograph [1/4].

On a separate web page "[26th day](#)" the initial intention of UFO-nauts is explained, that in 2005 UFO-nauts were going to induce murderous tsunami on the Atlantic Ocean. This tsunami supposed to destroy coasts of Europe and America. It appears, that for some reasons UFO-nauts decided to replace this tsunami with destruction caused in another manner. So instead of tsunami they induced equally destructive hurricane Katrina. This hurricane caused in New Orleans and vicinity almost the same destruction, as the one caused in Indonesia and in Thailand by tsunami of 26 December 2004.

Part #E: The cyclone "Nargis" (Burma) of Saturday and Sunday, 3 and 4 May 2008:

#E1. The murderous cyclone "Nargis" which devastated Burma (Myanmar):

Motto: "If every detail of a cyclone confirms to be secretly formed by UFOs, the entire cyclone must be formed by UFOs."

In our naivety we believe, that all cyclones, hurricanes, or typhoons on the Earth, are caused by natural means. However, a large body of evidence in existence confirms that, amongst others, the murderous cyclone "Nargis" was also formed technically by UFO vehicles. I am going to describe this body of evidence in item #E2 below. Amongst others, the evidence includes facts which conclusively confirm that the cyclone "Nargis" originated technically from advanced technology of UFO-nauts. On the other hand descriptions from previous parts of this web page explain thoroughly the mechanism of the formation of cyclones (hurricanes), and the manner in which UFO vehicles utilise this mechanism for the devastation of the humanity with murderous cyclones, such as "Nargis".

The cyclone called "Nargis" devastated Burma in weekend (i.e. on Saturday and Sunday) of 3rd and 4th May 2008. It acted intelligently, selectively destroying just this narrow and curved country, while it did NOT caused any damage in neighbourly countries. Winds of this cyclone reached around 190 km/h. Burma is a country of around 53 millions of people, ruled by a dictatorial military junta. It is located in the south-east Asia, not far from India and Indonesia. It is a neighbour of Thailand. The cyclone "Nargis" which devastated Burma displayed a number of extraordinary attributes, which are going to be discussed below. For example, one of such extraordinary attributes was that in the result of a double configuration which rotated synchronously, it piled up sea water to the height of around 3.5 metres, then with this wall of sea water it hit the densely populated coastal settlements of Burma. (The cyclone "Nargis" for a short period of time was composed like from two independent cyclones that rotated synchronously and thus created a kind of "wind pump for water" - see these two cyclones shown below in photograph from "Fig. #E1".) The hit of this wall of water was carried out at early morning on Saturday, 3rd May 2008 - i.e. when the majority of its victims still were sleeping unaware of the approaching catastrophe. In turn the 3.5 meters high wall of sea water which this cyclone piled up at the sea coast, was then pushed as deep as 40 km inland from the coast. The height of this water exceeded the height of local buildings. For this reasons the cyclone caused numerous human deaths and extensive damage to properties. For example, in the first information on its subject, published in New Zealand, amongst others, in the article "Fields of corpses", from pages A1 and B1 of the New Zealand newspaper [The Dominion Post](#), issue dated on Wednesday, May 7, 2008, and also in the article "15,000 dead, 30,000 missing" from page B1 of the newspaper [The New Zealand Herald](#), issue dated on Wednesday, May 7, 2008, the number of victims was defined at around 15 plus 30 thousands. But already the next day, in the article "Up to 63,000 feared dead as waters recede" from page A1 of the New Zealand newspaper [The Dominion Post](#), issue dated on Thursday, May 8, 2008, the number of victims of this cyclone was estimated at around 63 thousands. On Friday, 9th May 2008, television news were indicating that the number of victims exceeds 100 thousands. Later even this number was increased. How many people really died in there probably we never learn. After all, the military regime of Burma is too chaotic and too slack in order to calculate this correctly. It also refuses to allow foreigners on its territory who would be better organised. The most destroyed parts of the Burma turned out to be low-lying coastal areas that form the delta of Irrawaddy river.

#E2. Evidence which confirms that the cyclone "Nargis" that devastated Burma was induced technically by UFOs:

Motto: "An inconvenient truth does NOT cease to be the truth only because

someone does NOT want to accept it."

From descriptions of the cyclone "Nargis", which were presented in newspapers and television, a whole array of facts emerges that directly document the technical origins of this murderous cyclone from advanced technology of UFO-nauts. Below indicated are the most significant amongst such facts. Of course, the majority of people probably is unable to accept the bitter truth that UFO vehicles may intentionally induce murderous cyclones (hurricanes) and then so control their course as to induce possibly the largest damage. Similarly, the majority of human experts is unable to comprehend that UFO vehicles fly thousands of light years only to hide from people and abduct humans at nights. However, the inconvenient truth does NOT cease to be the truth only because someone does NOT want to accept it. So let us now review the most significant facts that confirm the technical origins from UFOs of this Burmese cyclone "Nargis" on 3rd and 4th May 2008:

1. The formation of "Nargis" from two counter-rotating cyclones coupled together into a single "wind pump". Satellite photographs of the cyclone "Nargis" revealed, that this cyclone was formed by coupling together two counter-rotating cyclones. Out of these two, the upper one (northern) rotated counter-clockwise, while the lower one (southern) rotated clockwise. The reproduction of these satellite photographs from newspapers is shown below on "Fig. #E1". Such a structure of the cyclone "Nargis" is shocking and it directly documents the technical origin. I do NOT understand why climatologists keep it covered with an ignorant silence. After all, in nature such low pressure clockwise cyclones appear exclusively in the southern hemisphere of the Earth. (While Burma lies on the northern hemisphere.) Thus in order to be able to join one of these to the counter-clockwise cyclone that rages on the northern hemisphere, and then attack Burma with it, this clockwise cyclone at night was moved technically by a UFO vehicle onto the northern hemisphere. The dragging of it is confirmed by the fact which is visible on the satellite photographs of it, namely that this clockwise cyclone sticks to the counter-clockwise one on its southern side. Of course, it is clear why UFO vehicles created technically such a double system of two counter-rotating cyclones. The reason is that such a system works like a huge whirling "pump for water". With the use of this pump, the 3.5 metre high wall of sea water was created from the nearby ocean. Then this high wall of water was directed by UFO-nauts at coasts of Burma, raging as far inland as around 40 km from the sea coast.

2. Intelligent hiding from people this unnatural, southern component of the double cyclone. In the double form, which is captured on the photograph from "Fig. #E1" below, the cyclone "Nargis" existed only shortly when it "pumped" 3.5 metre high wall of sea water onto the low-level areas of the Irrawaddy delta. Most clearly UFO-nauts were aware that such an unnatural formation of the cyclone into a shape of a "whirling pump" may induce someone's suspicions. Therefore they formed this "pump" at night, when satellites were unable to photograph what happened. In early morning on Saturday, 3 May 2008, UFO-nauts only flooded with the wall of sea water (pilled up by this "pump") the low-level coast areas of the Irrawaddy delta. Then, immediately after the wall of water did its destruction and drowned thousands of people, UFO-nauts released

from their hold the lower (southern) unnatural component of both coupled cyclones, which immediately disappeared. Further destruction they carried out just with a single component - so that the majority of time the cyclone looked like it was of a "natural" origin. It should be stressed here, that such an intelligent, hidden, and just temporary magnification of destruction capabilities of the cyclone "Nargis" through coupling it together from two counter-rotating hurricanes, practically means that from the very beginning this cyclone was designed as a tool of intentional (but secretive) destruction of Burma.

3. This cyclone manoeuvred intelligently and so precisely, that it devastated only one country (Burma), while after arriving to the end of curved Burma it rapidly disappeared. Burma ("Myanmar") destroyed by the cyclone "Nargis" is a long country, which occupies mainly the basin of river Irrawaddy. The territory of it is additionally like "curved". Initially (to "trick" people) the cyclone followed a trajectory that was typical for local cyclones aimed at Bangladesh. Only in the last moment it turned sharply eastward and hit at Burma. As it turned out later, the cyclone moved precisely along this "curved" country, even making a turn to thoroughly destroy the entire territory of it. After the cyclone arrived to the end of Burma, it rapidly disappeared. Such a precise control over the trajectory, area of destruction, and the time of disappearance of the cyclone would NOT be possible if it was NOT controlled intelligently by crews of UFO vehicles which induced this cyclone and controlled its motion. Furthermore, UFOonauts had important reasons to limit their murderous activities to just a single country - after all, just a single country had less chances to detect that it was attacked by UFO vehicles.

4. The destruction caused by this cyclone was additionally and intentionally multiplied by the action of local government which operated as if it was harbouring agents of UFOonauts. As this is explained more comprehensively on the web pages ["changelings.htm" - about methods of infiltrating organisations by agents of UFOonauts](#) and ["evil.htm" - about origins of all evil on the Earth](#), because of the close relation and identical appearance of UFOonauts and people, there are premises which suggest that UFOonauts have (and use) methods and capabilities to maintain their agents in practically every government on the Earth which they intend to control. In turn these agents have capabilities to undertake such decisions and actions which assist in every intentions that UFOonauts are just secretly implementing on the Earth. Since UFOonauts decided to destroy secretly Burma, their agents (which probably acted inside of the government) did everything in their powers to make this destruction as enormous as possible. And in fact there is a whole array of facts which documents that some **dark forces** from within the government of Burma carried out sabotages from inside, in practically every matter that could ease the suffering of the nation and the size of destruction. These most repeated in the press out of such strange sabotages included, amongst others: **(a)** The fact that India gave Burma 48 hours notice of the cyclone being on its way. Yet the government of Burma would NOT issue a warning to its citizens. (A governmental radio in Burma broadcasted only one message that this cyclone is approaching just shortly before the cyclone hit Burma.) **(b)** The creation by the government of Burma all possible obstacles to make impossible the arrival of the help on time. For example, there were numerous refusals and delays of visas for overseas

specialists who arrived with the assistance to save victims of the cyclone from hunger and illnesses, overseas airplanes and boats with food, water, and medicine were not allowed in, local governmental help for victims of the cyclone was slow and just within a small range from the capitol, etc., etc. **(c)** Concentrating the entire attention of the government and army of Burma at preparations and running the political referendum regarding the constitution that would legalise the military rules, instead on the saving victims of the cyclone.

5. The cyclone was accompanied by very interesting "coincidence" of a high propaganda meaning, which serves perfectly goals of present propaganda of UFOnavts. Namely, at the moment of attack of this cyclone, by some strange "coincidence" as many as three USA navy vessels were then trained by the coast of Burma for the salvage actions in case of just such cyclones. Thus, the behaviour of the Burma government which refused to allow staff of these vessels onto the territory of its country, increased additionally the psychological feeling of abandoning and hopelessness of the nation destroyed by the cyclone.

6. The cyclone hit on weekend, means when almost all human institutions were closed, or had just a limited personnel. As this is explained in volume 11 of [monograph \[1/4\]](#), in order to increase the destruction, UFOnavts carry out their criminal activities almost always in weekends or in public holidays - so that there is difficult to organise any warning, prevention, or salvation.

7. In 9 days after the cyclone "Nargis", a murderous earthquake hit China on Monday, 12 May 2008. As this is explained in item #E3 of this web page, an attribute of methods of hidden attacks of UFOnavts on the humanity is that typically UFOnavts induce technically two disasters, one after the other - in this case the cyclone from Burma and the earthquake from China.

8. This cyclone generated non-typical roar that sounded technologically like a powerful jet engine. Such a roar does NOT appear in natural cyclones, but it appeared once during the [tsunami "organized" by UFOnavts and described on the web page "day26.htm"](#). Means, only the action of propulsion of UFOs could so change parameters of this cyclone that it induced such an unusual roar.

Quite informative turned out to be the article [1E2] entitled "Swamped", which appeared on page B1 of the New Zealand newspaper [The Dominion Post](#), issue dated on Thursday, May 8, 2008. This article was written by a correspondent who was just present in Burma territory, and thus who could report effects of this cyclone from the area of the destruction. (The majority of other articles were based on telephone interviews carried out from outside of Burma, as the military government of Burma in spite of this catastrophe would NOT allow almost anyone inside.) This article revealed several further extraordinary attributes of the cyclone "Nargis", which (the attributes) strongly and directly confirm the technical origins of it from UFOs. Here are the most vital amongst these:

9. Bodies of victims of the cyclone were burned by powerful magnetic field of UFOs. The above article [1E2] describes, that "... some survivors appeared to have suffered chemical burns during the storm ..."). On the other hand it is known to us from research on UFOs, that the powerful magnetic field

utilised by UFOs for the propelling purposes, causes just such burns (as if made by chemicals) in the mode of "magnetic whirl". (E.g. magnetic burns of just such origin are visible on ears of the cat shown in "Fig. #B1" on the web page ["bandits.htm" - about bandits from UFOs eager to stub our backs.](#)) But because victims of this technically induced cyclone had no idea that they were burned by the field of UFOs, these victims suspected that during the cyclone they accidentally were affected by some burning chemicals.

10. Black (burned) bodies of dead victims of the cyclone. According to reports provided amongst others in the above article [1E2], and also in another article "A journey from horror to sorrow" from pages A1 and A3 of the newspaper [The New Zealand Herald](#), issue dated on Friday, May 9, 2008, the sight of dead victims of the cyclone "Nargis" revealed "... blackened bodies of people and animals ...". In turn similar blackened, like burned to charcoal, bodies of animals I personally saw during my research on the UFO landing sites in New Zealand. For example, in the lowest UFO landing site shown in "Fig. #E1" from the web page ["ufo_proof.htm" - about the formal scientific proof that "UFO vehicles do exist"](#), I found a hedgehog that was magnetically burned and dried out by a powerful magnetic field of a UFO. This hedgehog was black like these burned bodies of victims of the cyclone from Burma. It was so dry that when I touch this hedgehog it disintegrated into a powder. Of course, in Burma these black bodies most probably do NOT disintegrate into a powder. After all, opposite to this hedgehog, the Burma bodies were larger - thus probably less burned by the magnetic field of UFOs. Also above Burma UFO vehicles were moving, not hovering motionlessly like above landing sites in New Zealand. Furthermore, in Burma bodies were NOT dry, but well wet in water brought by the cyclone.

Fig. #E1abc: Photographs which illustrate these features of the cyclone "Nargis" that disclose its technical formation by UFO vehicles. Namely, in

order to multiply its destructive capability, the cyclone "Nargis" (shown above on the left photo "a") in fact was combined by UFO vehicles from as many as two cyclones that span in opposite directions. In order to realise the technical combining of this cyclone, on the middle "b" and right "c" photograph are shown two natural cyclones, each one of which spins in an opposite direction. (Each one of these is described more comprehensively in "Fig. #B1" from the initial part of this web page.) Thus, through comparing these three different kinds of cyclones, one can notice in what manner UFO vehicles created this murderous cyclone "Nargis". These UFO vehicles simply "caught" two natural "low-pressure whirls of counter-matter". Then to the counter-clockwise cyclone which then approached Burma (means to the cyclone similar to the one shown in the middle photograph "b" - which whirls in the counter-clockwise direction) UFOonauts technically dragged with their UFO vehicles another clockwise "low-pressure whirl of counter-matter" which span somewhere in the southern hemisphere of the Earth. This clockwise cyclone, means a cyclone which whirled in the clockwise direction, looked similarly to the one from the right photograph "c" above. After it was brought to Burma, UFOonauts placed this clockwise cyclone just under the counter-clockwise cyclone, thus forming a murderous "whirling pump". When this pump flooded the delta Irrawaddy river with sea water, UFOonauts simply released it from the hold, so that it returned on its own into the natural position somewhere in the southern hemisphere of the Earth.

Fig. #E1a (left): A satellite photograph of the cyclone "Nargis", which destroyed Burma in weekend (Saturday and Sunday) on 3rd and 4th May 2008. More on its subject can be read on the web page <http://www.popsci.com/environment/article/2008-05/ripple-effect-wake-cyclone-nargis> (only that dates provided there unfortunately contain an error - e.g. this cyclone had the "landfall" shown on the above photograph on 3rd May 2008, not on 1st May). It is worth to notice, that for a short period of time when it flooded the low-lying areas of the delta Irrawaddy, this cyclone was secretly (at night) transformed by intelligent coupling together two counter-rotating hurricanes, means the upper one which rotated counter-clockwise, and the lower one which rotated clockwise. The coupling these two hurricanes together formed a kind of "wind tunnel" (or whirling "water pump") which flooded the south-east Burma with 3.5 metre wall of sea water up to 40 km inland. However, immediately after drowning tens of thousands of people with this wall of water, the lower (southern) unnatural component of this cyclone was released from the tow and disappeared. Thus the above, definitively "technological" form the cyclone existed just for a short period of time - so that none amongst people could realise "what really is going on". (Click on this photograph to see it enlarged.)

Unfortunately this photograph does NOT belong to the most clear ones, as it was reproduced from a newspaper. (Reader probably saw one of these photographs, as after the cyclone the above photograph was published by practically every newspaper and every television news.) However, in spite of a low clarity, still on this photograph one can see clockwise spinning strands of the

lower componential-cyclone, as well as two small "eyes" of both cyclones coupled together. (These "eyes" are simply areas of silence and the lack of clouds, which always lie in the very centre of the cyclone, hurricane or typhoon. In case of cyclones induced technically by UFO vehicles, it is this "eye" where a UFO vehicle which propels and controls the cyclone, is located.) On the above photograph it is clearly visible, that the upper one amongst both counter-rotating cyclones moves counter-clockwise (so it is a typical cyclone for the northern hemisphere of the Earth on which Burma is located). But the lower one amongst these two counter-rotating low-pressure cyclones spins clockwise - while this direction of low-pressure spin never appears in the nature on the northern hemisphere of the Earth. This in turn means that the lower "clockwise" cyclone needed to be brought to Burma secretly at night from the southern hemisphere of the Earth. In order to carry out such bringing of a cyclone, a powerful UFO vehicle needed to be used. (Every UFO vehicle that propels and controls a cyclone described here worked in the so-called "mode of telekinetic flickering" that is explained on the web page ["dipolar gravity.htm" - about the Concept of Dipolar Gravity](#), and thus the existence of this UFO vehicle remained unnoticeable to people.)

Fig. #E1b (middle): An example of the appearance and main features of a counter-clockwise cyclone. In the nature such counter-clockwise cyclones (hurricanes or typhoons) appear exclusively on the northern hemisphere of the Earth. More comprehensive description of this cyclone is already provided in caption for "Fig. #B1a" from the initial part of this web page.

Fig. #E1c (right): An example of the appearance and main features of a clockwise cyclone. In the nature such clockwise cyclones (hurricanes or typhoons) appear exclusively on the southern hemisphere of the Earth. More comprehensive description of this cyclone is already provided in caption for "Fig. #B1b" from the initial part of this web page.

#E3. Why the earthquake in China of 7.9 force that took place on Monday, 12 May 2008 at 2:28 pm (local time) was a typical "trick" of UFO-nauts aimed at distracting the attention of people from the cyclone "Nargis" of Burma:

Motto: "Earthquakes are easy for technical creation through detonation of UFO's Oscillatory Chambers, but difficult for recognising by people who are NOT familiar with detonations of Oscillatory Chambers."

Why only 9 days after the cyclone in Burma China was hit by a murderous earthquake? Well, UFO-nauts have this nasty habit that are prepared to kill just in

order to divert more effectively the attention of people from noticing that these are them who caused problems again. Thus typically UFO-nauts induce technically as many as two disasters one after the other. The first of these disasters is aimed at the destruction of an area of the Earth. In turn the second disaster is aimed, amongst others, at diverting the attention from the participation of UFO-nauts in the first disaster. Just such two disasters appeared in case of the famous tsunami induced technically by UFOs on 26 December 2004 - for details see the totaliztic web page [day26.htm - about the murderous tsunami induced technically by UFOs on 26th December 2004](#). (This second disaster was then the cyclone which devastated Vietnam.) Also this happened in case of the hurricane "Katrina" which devastated the New Orleans on 29 August 2005 - for descriptions of "Katrina" see part #D of this web page. (This second disaster that was to divert attention from "Katrina" was the hurricane "Rita" which devastated parts of Mexico.) Also in this way UFO-nauts acted after the technical evaporation of WTC skyscrapers in New York on 11 September 2001 - for details see the totaliztic web page [wtc.htm - about evaporation of WTC in New York by UFOs on 11 September 2001](#). (This second catastrophe induced technically by UFOs was then shooting down the airplane with Israeli tourists over Black Sea - blamed later onto Ukrainian military missile.)

As it turned out, UFO-nauts repeated this their "trick of diverting the attention" also in case of the cyclone "Nargis" from Burma. Namely, on Monday, 12 May 2008, means just in 9 days after the cyclone "Nargis", UFO-nauts induced technically a highly destructive earthquake of the power 7.9 in southern China. The epicentre of this Chinese earthquake was located around 10 km underground in the Chinese province Sichuan. This earthquake turned out to be the worst in China for the period of last 60 years. Initially the number of human victims was estimated at 12 000. But on Saturday, 17/05/08 it was lifted to an estimated number of 50 000 killed people. More data about this earthquake was published in newspaper articles, e.g. in articles "Rain impedes rubble rescue" from page B1 of newspaper [The New Zealand Herald](#), issue dated on Wednesday, May 14, 2008, and "Struggle to reach survivors" from page B1 of New Zealand newspaper [The Dominion Post](#), issue dated on Wednesday, May 14, 2008.

The [technical inducing of an earthquake by UFOs](#) is very easy. UFO-nauts simply detonate underground a UFO vehicle of a smaller type, which [Oscillatory Chambers](#) are loaded with huge amounts of magnetic energy. This allows them to place the epicentre of their earthquake exactly under the goal of their attack, means under the area which UFO-nauts intend to destroy (even if this goal of the attack does not lie above a "fault-line" of a continental plate). Furthermore, it allows also UFO-nauts to select exactly the power of the earthquake that they induce, through exploding a strictly calculated amount of energy. But simultaneously such explosion of UFO's Oscillatory Chambers unleashes a whole range of unique attributes and phenomena which after being learned by people allow us to identify earthquakes induced technically by UFO vehicles, and to distinguish these from natural earthquakes. About the fact that the Chinese earthquake described here was also induced technically by UFO vehicles certifies the presence of several such unique attributes. Let us indicate here at least the most important amongst these:

1. Telekinetic formation of a kind of "mist" near the epicentre of the underground UFO explosion (and also unique "hissing noise"). A unique attribute of the [earthquakes induced technically by UFOs](#), is that the underground explosion of [Oscillatory Chambers](#) of a UFO, loaded with magnetic energy, causes a kind of powerful **magnetic flash**. In turn a consequence of this "magnetic flash" is, amongst others, the magnetic excitation of a whole range of extraordinary phenomena near the place where such Oscillatory Chambers exploded (i.e. near the epicentre of a given earthquake induced technically by UFO vehicles). None of these phenomena appears in natural earthquakes. To the most extraordinary amongst these phenomena belongs the telekinetic formation in the air of a kind of like "white fog" or "smoke" - which actually is composed of particles of the air that because being telekinetised assumed white colour. This unusual white like "fog", which rapidly "materialised" in mid-air, registered numerous amateur video cameras in China, at the moment of the earthquake discussed here. Some of such videos which captured the "fog" were shown later in television of practically every country in the world - probably the reader also saw these. What even more interesting, just such a telekinetic white "fog" was also noticed during the famous tsunami induced technically by UFOs on 26 December 2004 - for descriptions of it see (3) in item #10 of the web page [day26.htm - about the murderous tsunami induced technically by UFOs on 26th December 2004](#). To other extraordinary phenomena induced by this "magnetic flash" from exploding Oscillatory Chambers of a UFO, belong amongst others the magnetic de-focusing of pictures recorded on video tapes - also clearly visible on videos recorded in China during the earthquake described here, and also strange magnetic distortion of sounds recorded on tapes - also registered in China. Moreover, the explosion of Oscillatory Chambers from UFOs induces a strange kind of "hissing noise" - unfortunately in earthquakes on a solid land this hissing noise was overpowered by other noises of the earthquake.

2. Combining the main earthquake from several waves with different speeds of propagation. Magnetic explosions induce in the Earth's crust several waves which propagate with different speeds. Therefore such technically induced earthquakes, including the China earthquake described here, always cause appearance of like several separate earthquakes occurring one after the other (i.e. when the subsequent of these waves with different speeds of propagation arrive to a given area). Independently from China, such several waves of shocks were noticed also in the tsunami of 26 December 2004, described on the web page [day26.htm - about the murderous tsunami induced technically by UFOs on 26th December 2004](#). Thus, still another attribute of earthquakes induced technically by UFO vehicles, which was present in China, is that a given earthquake is combined from at least three waves of shocks, which are like symmetrical towards each other, and each of which can contain tens of separate chaotic quakes. Of course, the present science all these puts into a common bag of "aftershocks".

3. Collapsing of an underground post-explosive cave which is a source of long-term appearance of numerous "aftershocks". An underground explosion of [Oscillatory Chambers](#) from a UFO, not only that generates an earthquake, but also forms under the ground a huge post-explosive cavity. This cavity does NOT appear after natural earthquakes. It then collapses gradually for

a long period of time. In turn this gradual collapsing of the underground post-explosive cavity causes a long series of chaotic "aftershocks", for which almost there is no end. For example, in China these aftershocks even as long as a week after the main earthquake still troubled local people at least 5 times a day.

4. Technical inducing chaotic vibrations. Natural earthquakes typically induce vibrations of the Earth's crust, which as a rule display a kind of orderly behaviour. After all, the natural mechanism of generation of earthquakes through the mutual slipping of two continental plates is similar to slipping of our finger pressed against wet glass - means the natural earthquake generates a series of rhythmical vibrations that are closely related to this regularly rattling squeak of the finger moved along wet glass. Therefore each larger natural earthquake is perceived as a rhythmic and "orderly" series of waves of the earth vibrations. I personally live sufficiently long in New Zealand, which is frequently troubled by earthquakes, to notice this rhythm and orderly fashion of natural earthquakes. For example, one time during a powerful earthquake I was just looking at a road along which there was a row of telephone poles. These poles started then to slant towards each other in a rhythmic oscillatory motion, looking like a row of mutually synchronised Japanese people who are rhythmically "bowing" to each other. Other time during a powerful earthquake I was just in a library on (probably) forth floor. I was looking at rows of high library shelves, as these shelves, similarly to the telephone poles that I described before, also rhythmically "bowed" towards each other. Still another time a long and powerful earthquake awake me at night when I was just in a bed. The bed was tossed up rhythmically in a highly orderly manner which me resembled a rhythmical beat and swaying of the type "tu tu tut, tu tu tut, tu tu tut, etc." experienced in old railway carriages which rolled over old rails that were composed of short sections screwed together (presently such pieces of rails are welded together into a single infinitively long piece on which wagons are not "tossed up" anymore). Also destructions and collapsing caused by natural earthquakes display a unique kind of "order". But earthquakes induced technically through underground explosions of UFOs' Oscillatory Chambers induce a large mixture of various chaotic vibrations. Thus, e.g. on videos such technically induced earthquakes appear as highly chaotic jerky tossing and swaying in all possible directions. In turn destruction induced by such explosion of UFOs' Oscillatory Chambers display a shockingly chaotic picture - e.g. buildings and other objects collapse in all possible (random) directions. This chaotic character of vibrations and destruction that results from the explosive (technical) rather than natural origin of the China earthquake we could see on videos that recorded the earthquake and destruction in China, which are described here.

5. Panic escape of toads from the vicinity of epicentre. As it is explained in the article [5#E3] "Frogs spark disaster fears" from page B2 of newspaper [The New Zealand Herald](#), issue dated on Wednesday, May 21, 2008, the days before earthquake, toads started a mass exodus from the vicinity of epicentre of this murderous earthquake in China. Supposedly in times of this [mass exodus of frogs, streets of the city Mianyang](#) from the province Sichuan literally were covered with toads escaping in panic. Someone even took a photo of these frogs and placed it on a blog. (Another mass escape of frogs 5 days before an earthquake was noted in Italy and described in the article [1#E6] from the web

page [day26.htm](#).) In turn, as this is known already, various animals are very sensitive to the changes in fields. Thus clearly toads could NOT withstand the field of UFOs. So when UFO vehicles started massive arrivals to the later epicentre of earthquake, in order to prepare the UFO explosion in there, these toads started to escape from the area in massive numbers. Interestingly, according to the above article [5#E3], in 8 days after that earthquake (i.e. on Tuesday, 20 May 2008) toads started to escape also from another city named Zunyi - thus inducing a panic of local people. The city Zunyi is located outside of the destruction zone. So either UFOonauts again started to prepare in there epicentre for another earthquake, or their vehicles that are invisible for human eyes started to arrive in there because UFOonauts discovered underground something that interests them a lot. I should mention here that in the area where was the epicentre for earthquake induced technically by UFOonauts, which induced the famous tsunami on 26 December 2004, also later an area was found, which was completely deprived of living creatures. Clearly residues of the UFO magnetic field still existing in there caused the escape from that zone practically all sea creatures. About this "dead zone" on the bottom of sea I am writing in (5) from item #D4 of the totaliztic web page [day26.htm - about the murderous tsunami of 26th December 2004](#).

It is worth to add that practically each one amongst the above attributes just by itself is a proof for the technical inducing this earthquake by UFOs. In turn all of them taken together give to this earthquake the certainty that it originates from the technical detonation (deeply underground) several UFO [Oscillatory Chambers](#) loaded with magnetic energy.

* * *

For me personally is puzzling why China does NOT undertake the construction of the apparatus for the remote detection of impending earthquakes which works on principles of the interpretation of contents of telepathic waves ("chi"), and which is known under a popular name of the "[Zhang Heng seismograph](#)". After all, it was invented by the Chinese genius already almost 2000 years ago. On the basis of historic records it is known that this apparatus was able to detect remotely earthquakes, which are just brewing up, from as far distances as even 500 kilometres - for details see the paper available under the address http://www-ist.massey.ac.nz/conferences/icst05/proceedings/ICST2005-Papers/ICST_112.pdf. The construction of this apparatus with the use of present technology surely would provide people with a tool that should allow to prevent disasters similar to the one that is described in this item.

Part #F: UFOs and UFOonauts hide a highly puzzling mystery about which is worth to know:

#F1. Although for people confronted with UFOs and UFOonauts these appear to be permanent, as well as permanent are outcomes of their operation, in fact UFOs and UFOonauts are just temporary "simulations":

In order to simplify explanations and to keep focused on the subject area, the content of this web page is written as if UFO vehicles and UFOonauts existed in a permanent manner - the same permanent as exist people and human vehicles. But - as this is explained on a number of other web pages, for example in item #L2 from the web page named [magnocraft.htm](#), in items #C2 and #K2 from the web page named [day26.htm](#) or in item #K1 from the web page named [explain.htm](#), both - UFO vehicles as well as UFOonauts, are just temporary "simulated" in each case when there is a need for someone amongst people to be confronted with them. Furthermore, also every present cataclysm displays "simulated" attributes and evidence, which suggest, that this cataclysm was induced technically by UFO vehicles - for more details see item #C2 from the web page [tornado.htm](#).

There is a whole array of reasons for which God "simulates" UFOonauts and UFO vehicles, as well as "simulates" permanent consequences of their operation on the Earth. An example of one amongst the most important out of these, is the need to use on people the principle of upbringing, which in item #F3 from the web page named [wszewilki_uk.htm](#), is described under the name of "**principle of reversals**". This principle raises people into tough, hardened in battle, "**soldiers of God**" described more comprehensively in item #B1.1 from the web page named [antichrist.htm](#). An example of another reason is to illustrate visually to people via the evil behaviours of UFOonauts and UFOs, to what leads the technical development carried out without a simultaneous moral development. This illustrating becomes especially vital in the face of fact, that the humanity stands currently at the beginning of times when it is going to have my [Magnocrafts](#) and [time vehicles](#) in its disposal. One amongst examples of such evil illustrated to us by UFOonauts, which humans are able to spread with the use of Magnocrafts, is described in items #B1 to #B4 from the web page [evil.htm](#), and also in the content of the Polish [treatise \[3b\]](#). Still another example of the reason for which God "simulates" UFOonauts and UFOs, is the need to replace the former "devils" with some creatures, which are still able to carry out evil which "devils" used to do in past, but simultaneously which are more acceptable than "devils" for increasingly atheistic societies.

Therefore, when there is a demand for a constructive use of information presented on this web page, then it is desirable to take a correction for this shocking fact, that UFOs and UFOonauts for very vital reasons are only temporary

"simulated" on the Earth.

Part #G: What we can learn from experiences to-date with hurricanes induced by UFOs:

#G1. For important reasons all most murderous cataclysms, including into this also hurricanes (cyclones and typhoons), are so "simulated" as if they are formed technically by UFO vehicles:

In items #C2 and #K2 of the web page [day26.htm](#) it is explained, and then confirmed with a significant body of empirical evidence, that every more murderous Act of God which kills a number of people, is always so intelligently implemented, that for more inquisitive researchers it makes available evidence that supports simultaneously 3 different origins of it. Namely, each Act of God contains in itself the body of evidence that it was caused **(1)** by intelligent God, **(2)** by a "wanton element" unleashed because of the work of nature, and **(3)** technically by UFO vehicles. Of course, each Act of God in fact can have only one origin. Thud two categories out of evidence listed above are simply skilfully "simulated".

This web page provides evidence for the "simulation" of origins of [hurricanes](#) (i.e. one amongst numerous kinds of Acts of God) as if, amongst others, these were induced technically by UFO vehicles. In turn evidence for similar "simulation" of other kinds of Acts of God is presented on web pages [day26.htm](#), [seismograph.htm](#), and [landslips.htm](#).

#G1. How to recognise hurricanes (cyclones and typhoons) which are "simulated" so intelligently as if they are formed technologically by UFO vehicles:

Previous items of this web page explained, that all most deadly Acts of

God, including into this number also **hurricanes** (and thus also cyclones or typhoons) and **tornadoes** are intentionally so "simulated" as if they, amongst others, were generated technically by UFO vehicles. Therefore in the vital interest of people lies to learn how distinguish hurricanes (cyclones or typhoons), and also these tornadoes, which are "simulated" as if these are induced technically by UFO-nauts, and how to distinguish these from hurricanes (cyclones or typhoons) and tornadoes that look as if originate naturally. As it turns out, the mechanism of formation of these phenomena, described in item #B1 above, provides us with a whole range of identification features, which allow a fast distinguishing between their "simulation" as exclusively the natural origin, and simulation as originating from nature and from technical formation by UFOs. Let us list here the most vital out of these features. Here they are:

(i) Every natural hurricane (cyclone or typhoon) has its own anti-hurricane (anti-cyclone or anti-typhoon) that appears on the opposite side of the globe. In item #B1 above, in subsection H5.4 from volume 4 of monograph [1/5], and also on web pages of totalizm that describe the mechanism of **hurricanes** and **tornadoes**, I explained comprehensively that hurricanes and tornadoes appear after the narrowing down (squeezing) a so-called "low-pressure whirl of counter-matter". These whirls are simply like huge snakes made of counter-matter and penetrating throughout our planet. So if one of them naturally is squeezed (i.e. narrows down the diameter of its spinning), then this squeezing reveals its presence on both sides of the Earth, in areas where this spinning like-snake of counter-matter emerges from the Earth. Therefore the **natural hurricanes (cyclones or typhoons) always appear in couples**. If one such a hurricane attacks e.g. the USA, then its mirror copy simultaneously appears on the southern Pacific and rages over there along an empty ocean. However, because these mirror copies of American hurricanes rage in the middle of relatively empty ocean (Pacific), rather rarely their existence is illustrated in the television or discussed by mass media. Still they always do exist and always one can see them on satellite photographs of the Earth. (Such photographs are available in the Internet - as an example see the web page www.ghcc.msfc.nasa.gov/GOES/.) While searching for such anti-hurricanes (anti-cyclones or anti-typhoons) one needs to remember, that according with principles of operation of whirls of counter-matter **these anti-hurricanes always whirl in the opposite direction than the original hurricanes for which they represent mirror copies**.

On the other hand the hurricanes (cyclones or typhoons) that are induced technically by UFOs do NOT form their mirror copies on the opposite sides of the globe. The reason for this lack of copies is that in case of a technical narrowing down a low-pressure whirl by a UFO, the whirl expands almost immediately after it emerges from UFO propulsors. Therefore this narrowed down section of the whirl is too short to still be able to form a hurricane after it emerges from the other side of the Earth.

(ii) Natural hurricanes (cyclones or typhoons) have their traditional trajectory along the surface of the Earth, to which they typically stick. In turn hurricanes (cyclones or typhoons) induced technically by UFOs can appear in completely unexpected areas, as they are dragged in there by UFO vehicles in order to carry out a selective destruction.

(iii) Trajectory of a hurricane (cyclone or typhoon) induced technically by UFOs displays a characteristic deviation from the course, finished with a rapid return to a previous course. Every whirl of counter-matter which forms a given hurricane (cyclone or typhoon) is linked in the counter-world with numerous other whirls of counter-matter. Together with these other whirls of counter-matter they move along our planet on trajectories that characteristic for them. So if UFO-nauts technically deflect this whirl from its typical course, then immediately after they stop this deflecting the whirl by itself returns to the continuation of the original course from which it was deflected. Just such a springy return on the previous course was displayed by the hurricane Katrina described in item #D1 above. Similarly behaved the hurricane "Rita" also described in item #D1 above. Furthermore, when the cyclone "Nargis" from item #E1 disappeared from Burma, most clearly it also returned to its original position (and expanded into just a low pressure system). But the best illustration for this self-propelled return of a technical hurricane to the trajectory that it followed originally provided the hurricane "**Wilma**" which on 20 to 23 October 2005 devastated the Mexican Riviera from Maya Strip on the Yucatan peninsular - especially the Mexican holiday city of Cancun. Before it become a technically induced hurricane, it was just a huge size low-pressure whirl which followed a typical trajectory of these low-pressure systems on the Atlantic Ocean from the south towards north along the trajectory that lies to the east from the Gulf of Mexico. But UFO vehicles intercepted this whirl and narrowed it down to the size of a hurricane. Simultaneously they dragged it to the west through Cuba until the Yucatan peninsular. Over there they held it in one place for the duration of over 3 days, devastating with it local holiday settlements. Then UFOs released it from the capture and allowed to return to its original trajectory. After it was released by UFOs this hurricane started to decompress fast losing on the power of winds. Simultaneously with the speed of around 40 km/h it moved in the direction north-east by cutting Florida on 24 October 2005, until it returned again on its original trajectory along which it moved towards north. As this is the case with every hurricane induced technically by UFOs, "Wilma" was also accompanied by several tornadoes and waterspouts induced by UFOs during dragging it.

(iv) Hurricanes (cyclones or typhoons) induced technically by UFOs are accompanied by tornadoes and/or waterspouts. The reason for appearance of these tornadoes or waterspouts are the same UFO vehicles which drag and narrow down the whirl of counter-matter that form a given hurricane (cyclone or typhoon). If in their flight these UFO vehicles accidentally cut through some path of another smaller whirl of counter-matter, then their funnel-shaped magnetic field configured especially for the narrowing down the whirls of counter-matter is also intercepting this smaller whirl forming from it just a **tornado or waterspout**.

(v) Hurricanes (cyclones or typhoons) induced technically by UFOs demonstrate intelligent behaviour. After all these are controlled intelligently by UFO crews who intend to destroy with them selectively chosen areas. Thus, e.g. they firstly deviate from their normal course, and go directly to their aim area which they intend to destroy. Then after the destruction is done, they fast decrease their destructive power and return to continuation of their normal course.

(vi) After every hurricane (cyclone or typhoon) induced technically by

UFOonauts appears an "explanation campaign" which stressed how natural this destructive phenomenon was. Via this campaign, carried out by [UFOonauts-changelings](#), UFOonauts make sure that people do NOT suspect that a given disaster was caused by UFOonauts.

The familiarity with the above attributes suffices for being able to distinguish natural hurricanes (cyclones or typhoons) from hurricanes (cyclones or typhoons) induced technically by UFOonauts. In turn the ability to distinguish between these two gives to us a capability to realise how much evil and destruction is caused on our planet by UFOonauts. From this is just a single step to the undertaking our popular uprising to defend the humanity from these cosmic murderers of people.

Part #H: Summary, and the final information of this web page:

#H1. Summary of this web page:

There are dangerous people in every society. In order to protect the population from them, societies on Earth lock such human trash in various institutions, hospitals, prisons, etc. But even while locked, they cause social harm, as they need to be fed, housed, entertained, watched, well treated, etc. So what the civilisation of UFOonauts do with their own perverts, degenerates, psychopaths, mentally ill, criminals, etc.? Well, according to what is explained on the web page [evil.htm - about origins of evil on the Earth](#), all this cosmic waste they pack to UFO vehicles and dump to Earth. In this way their politicians "kill several birds with a single stone". Namely, their society frees itself from this scum and does NOT need to cover costs of locking them up, watching, feeding, etc. Furthermore, this social trash becomes useful. After all, in the name of their civilisation, they govern and exploit human colony on Earth. In turn these perverts, degenerates, psychopaths, mentally ill, criminals, etc., by themselves are also very happy. After all, on Earth they are allowed to rape, rob, murder, and do any atrocity that their twisted minds can only dream of, and no-one is bothered by this on their own planet, nor no-one from their civilisation says a word. Their families are happy as well, as their deviated relatives have good jobs and appear to be satisfied with the life. Also politicians on the UFO planet are happy. After all, none of their voters is complaining nor condemning, that these perverts, degenerates, psychopaths, mentally ill, criminals, etc., from UFOs receive an inhumane treatment. The only ones who could have something against such a situation, are inhabitants of the planet Earth. After all, these social outlaws from UFOs continually torment humanity with various plagues, earthquakes, tsunami waves, tornados, hurricanes, killings, bombings, wars, etc. Fortunately for UFOonauts, scientists on the Earth still remain [incompetent in research of intelligences which do NOT cooperate with them](#) - such as UFOonauts. Thus

instead of researching these different intelligences, human scientists are preoccupied with denying that UFOs do exist at all. This web page explains how this cosmic scum dumped to Earth from the UFO planet gradually finishes humanity with continuous hurricanes which they form technically on purpose with their UFO vehicles. It complements and extends a whole array of other similar web pages indicated in item #C2, which explain that the same scum from the planet of UFOonauts destroy also humanity on several other manners. In each separate item of this web page was discussed another aspect of the **hurricanes** induced technically by of UFOonauts in order to torment humanity. Let's us hope that the revealing these facts is going to induce the need for defending ourselves against secretive attacks of these criminal relatives of humans.

#H2. How with the web page named "[skorowidz links.htm](#)" one can find totaliztic descriptions of topics in which he is interested:

A whole array of topics equally interesting as these from the above web page, is also discussed from the angle that is unique to the philosophy of totalizm. All these related topics can be found and identified with the use of **content index** prepared especially to make easier finding these web pages and topics. The name "index" means a list of "key words" usually provided at the end of textbooks, which allows to find fast the description or the topic in which we are interested. My web pages also has such a content "index" - only that it is additionally supplied in green **links** which after "clicking" at them with a mouse immediately open the web page with the topic that interest the reader. This content "index" is provided on the web page named **skorowidz links.htm**. It can be called from the "organising" part of "Menu 1" of every totaliztic web page. I would recommend to look at it and to begin using it systematically - after all it brings closer hundreds of totaliztic topics which can be of interest to everyone.

#H3. I suggest to return periodically to this web page for further information:

In order to keep checking how our knowledge unfolds, it is worth to return periodically to this web page. By the definition, this web page is going to be improved and extended further, as soon as the course of events on the Earth, is going to advance even more.

#H4. Blogs of totalizm:

It is also worth to check periodically the blog of totalizm recently available at two address, e.g.: totalizm.wordpress.com, and totalizm.blox.pl/html. (Notice that all these addresses hold the same blog with the same content of messages.) On this blog many matters discussed here are also explained with additional details written as new events unveil before our eyes.

#H5. Emails to the author of this web page:

Current email addresses to the author of this web page, i.e. officially to Dr Eng. Jan Pajak while courteously to **Prof. Dr Eng. Jan Pajak**, at which readers can post possible comments, opinions, descriptions, or information which in their opinion I should learn, are provided on the web page named [pajak_jan_uk.htm](#) (for its version in the HTML language), or the web page named [pajak_jan_uk.pdf](#) (for the version of the web page "pajak_jan_uk.pdf" in safe PDF format - which safe PDF versions of further web pages by the author can also be downloaded via links from item #B1 of the web page named [text_11.htm](#)).

The author's right for the use of **courteous** title of "Professor" stems from the custom that "with professors is like with generals", namely **when someone is once a professor, than he or she courteously remains a professor forever**. In turn the author of this web page was a professor at 4 different universities, i.e. at 3 of them, from 1 September 1992 until 31 October 1998, as an "Associate Professor" from English-based educational system, while on one university as a (Full) "Professor" (since 1 March 2007 till 31 December 2007 - means at the last place of employment in his professional life).

However, please notice that because of my rather chronic lack of time, I **reluctantly reply to emails which contain JUST time consuming requests**, while simultaneously they document a complete ignorance of their author in the topic area which I am researching.

#H6. A copy of this web page is also disseminated as a brochure from series [11] in the safe format "PDF":

This web page is also available in the form of a brochure marked [\[11\]](#), which

is prepared in "PDF" ("Portable Document Format") - currently considered to be the most safe amongst all internet formats, as normally viruses cannot cling to PDF. This clear brochure is ready both, for printing, as well as for reading from a computer screen. It also has all its [green links](#) still active. Thus, if it is read from the computer screen connected to internet, then after clicking onto these green links, the linked web pages and illustrations will open. Unfortunately, because the volume of it is around a double of the volume of web page which this brochure publishes, the memory limitations on a significant number of free servers which I use, do NOT allow to offer it from them (so if it does NOT download from this address, because it is NOT available on this server, then you should click onto any other address from [Menu 3](#), and then check whether in there it is available). In order to open this brochure (and/or download it to own computer), it suffices to either click on the following green link

[katrina.pdf](#)

or to open from any totaliztic web site the PDF file named as in the above green link.

If the reader wishes to check, whether some other totaliztic web page which he or she just is studying, is also available in the form of such PDF brochure, then should check whether it is listed amongst links from "part #B" of the web page named [text 11.htm](#). This is because links from there indicate all totaliztic web pages, which are already published as such brochures from series [11] in PDF format. I wish you a fruitful reading!
